#### **Section 4.2 – Declaration of Exempt Information**

The sections and subsections listed below contain Trade Secrets, as defined by s. 812.081 & s. 688.002., F.S., and are therefore exempt from disclosure under 119.07(1) and s. 24(a), Art. I of the State Constitution. The Trade Secret information identified as exempt from public disclosure has been provided in the “Redacted Copy” of our application, and the below listing identifies each section and subsection of the application that has been excluded from the Redacted Copy.

Section Exempt as Trade Secrets (s. 381.83, s. 812.081, & 688.002, F.S.): Pursuant to s. 812.081, & 688.002, F.S., Florida has adopted the Federal Uniform Trade Secrets Act in its statutes. In fact, s. 688.002, F.S., defines a trade secret as “information, including a formula, pattern, compilation, program, device, method, technique, or process that: (a) Derives independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use; and (b) Is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.”

Our company has been involved in highly competitive medical marijuana application processes in limited license states throughout the U.S. and has developed its method, technique, or process at great cost to the company. As referenced in our application, our company has managed 65 cannabis licenses across seven states over the last six years, including currently managing 27 dispensaries, four indoor cultivation facilities with over 180,000 sqft of canopy, 500 employees, three production/manufacturing facilities, and a secure medical cannabis transport operation which conducts over 200 deliveries per week. In other words, we have put significant time, effort, and millions of dollars into developing proprietary standard operating

procedures based on industry best-practices which form the basis of our applications. In fact, our success in winning licenses in limited license states, in large part, is derived from the techniques employed by our operational businesses, making our application content extremely valuable to our competitors. To that end, our applications materials are only available to a select few employees and are only shared on a need-to-know basis.

In light of the above, disclosure of the sections identified below would cause unfair competitive harm by giving future applicants for MMTC licenses (or applicants for licenses in other markets) the ability to utilize our application materials in their submission. This could further harm Florida’s medical marijuana market, and cause harm to patients, by allowing less-qualified applicants to appear knowledgeable and capable of carrying out the complex and highly technical work of MMTCs on the basis of application content that reflects methods, techniques, or processes, which they had no part in developing.

**Reservation of Claims/Rights:** The justifications detailed in this document are intended as a summary, and the Applicant hereby reserves its right to *all* claims, defenses, demands, cause of action, justifications, or any other rights whatsoever related to the Applicant’s ability to redact its application and shield it from public disclosure pursuant to trade secret, confidentiality, or other laws. Subject to the foregoing, we have provided a table below listing each section of our application which is exempt from public disclosure under Florida law.
